2. Guidelines
   a. This is a conversation
   b. Ask Questions
   c. There are no “Rules” (and the points don’t matter)
3. Not all questions need to be addressed
   a. skip around
   b. add questions
   c. plead the 5th
Guiding Questions/Conversation Starters

- Why is inclusion important to you?
- What types of supports do you have for meeting all of your students’ needs?
- What do you do that makes inclusion work in your classroom?
- How do you group your students?
- What are examples of accommodations that you make for students? Are those accommodations able to be used with any student who needs support?
- Was teaching in an inclusive classroom your choice?
Definition of Disability Studies in Education (DSE)

- Privilege the interests, agendas of people labeled with disability/disabled people

- Promote social justice, equitable and inclusive educational opportunities, and full meaningful access to all aspects of society for people labeled with disability/disabled people; and

- Assume competence and reject deficit models of disability

  (Connor, Gabel, Gallagher, & Morton, 2008, pp. 447-48)
Legal foundation for inclusive education

• 1975- Education for All Handicapped Children Act (Public Law 94-142)
• Reauthorization in 1990 & 1997- Individuals with Disabilities Education Act;
• Reauthorization in 2004 - Individuals with Disabilities Education Improvement Act
Major Assurances of IDEA

• Zero Reject
• Non-Discriminatory Evaluation
• Free and Appropriate Public Education
• Least Restrictive Environment
• Parental Participation
• Program Development (IEP)
• Procedural Due Process
What does this mean?

• Special education is *not* a place
• It *is a service* that follows the student
• Neighborhood schools
• Students don’t have to all have the same goals and outcomes to get benefit
• Supplemental supports, aids, and services

• *Can we? vs. HOW can we?*
LDA Video Example

What are the implications for us as educators?
Presume Competence

A principle of believing in “intellectual ability, provid[ing] opportunities to be exposed to learning, assum[ing] the child wants to learn and assert him or herself in the world” (Biklen, 2000)

Construct opportunities for competence

“School personnel need to actively construct competence and create contexts wherein students who do not speak can engage meaningfully in instruction, demonstrate their understanding, and make that understanding available to others” (Ashby & Kasa, 2013)
